# OPTIMIZE WAREHOUSE OPERATIONS WITH PDT SOLUTIONS

Customized Handheld Devices for a Smart World

Contents

1 The Need for Modernizing Logistics Infrastructure

Why Use Paperwork When You Can Now Enter Transactions On The Go....

Speed of transactions has become a much sought after value indicator for modern retail enterprises. The entire supply chain can be optimized significantly solely by introducing technology innovations related to remote automation from the field - the warehouse, the customer service center and the store. Barcode scanning technology along with programmable handheld device solutions are playing a pivotal role in this objective of achieving maximum real time transactions for enabling business continuity and increased profitability. Today's ERP solutions are supplemented with add-on products that are directly embedded within handheld terminals, thus providing large scale enterprises with that extra edge needed to deliver superior quality and efficiency to their end customers. These modern, hi-tech handheld terminals are programmed for scale and quality with the unique ability to process transactions in batch mode, making a strong business case for their presence in the technology ecosystem.

2 Godrej Infotech Limited – Microsoft AX 2012 PDT Capabilities

Commonly used transactions that can be entered using this solution are:

With over three decades of domain expertise and retail technology know how, Godrej Infotech Limited has actively worked with multinational clients to address the challenges of handling the inherent inefficiencies that exist in communicating between disparate departments and locations. The handheld device solution is a state-of-the-art mechanism that allows for direct transaction entry into the AX 2012 ERP System.

Store personnel can trigger purchase orders and requisitions as soon as they see items nearing depletion levels

Quality assurance agents can write off deliveries as soon as they see non compliant items

Stock counting and tagging can be done in roaming mode so that the system is always updated with accurate numbers

Sales staff can immediately answer customer enquiries, thus ensuring a responsive user experience

3 Features

- Capable of Handling Real Time PO Creation and Inventory Transactions

- Compatible with Standard Windows Based Handheld Devices

- Direct Connectivity with AX ERP System through Remote Desktop

- Rich Client AX2012 User Interface

4 Benefits

- Faster as compared to Competitor Handheld Devices as it works natively with AX2012

- Lower Total Cost of Ownership since maintenance of integration application is eliminated

5 Vital Statistics

- Paperwork - 95%

- Data Accuracy - 20%

- Operational Efficiency - 75%

6 Case Study - Abu Dhabi's Multi Business Co-operation Modernizes Operations with MD AX Retail

A completely real time inventory management, procurement, sourcing, warehouse and transportation solution has been conceptualized, developed, deployed and tested with more than 250 PDT machines in use at the client's warehouses and stores. As many as 12 operations have been combined into a single scan leading to a drastic improvement in productivity for this large scale retail organization.
